

SPIROMETRY (LUNG FUNCTION) TESTING

The National Lung Health Education Program encourages office spirometry for diagnosis in Angina and COPD as well as other diseases, screening for all smokers, former smokers 45 years or older, and for persons with dyspnea on exertion (shortness of breath), chronic cough, wheezing, or asthma.

Your Provider, _____, has ordered for you to have a spirometry test.

_____ Just Spirometry

_____ Spirometry, then nebulizer treatment (bronchodilator), then repeat spirometry.

You can schedule for your spirometry on Tuesday AM _____. You can expect to be in the office at least 45 mins. for this breathing test. Your lung capacity will be tested, and then you may receive a breathing treatment and then be tested again afterward.

Don't take any Albuterol prior to the test.

Please make an appointment with your provider to review the test results. Your appointment to review results is on _____.
